President's Message: Moving Forward

It brings me great joy to be part of the Waterloo student chapter, a team with a long history. At the 2019 conference in Ottawa, connecting with fellow ITE student members and seeing the possibilities for our own chapter inspired me to take a larger role on campus. Change is the air for the industry, which is why we are rebooting the structure and direction of our chapter with the aim of staying current, sustainable, and relevant to students interested in transportation engineering.

This year, we consolidated our executive team to improve the efficiency of our operations. Our goal over the next year is to focus on planning activities more directly related to transportation systems; we are aiming to host speaker events, local transportation tours, and technical tutorials that will both pique curiosity and broaden our knowledge of the field. Last, but certainly not least, we will be fielding a Traffic Bowl team to compete at the CITE/QUAD 2020 conference in Vancouver this year; this will be the first time in four years we have participated, and we hope to make a strong showing..

In the upcoming year, our main goal will be to nurture the seeds that have been planted this past year and grow our chapter. With the University of Waterloo's renowned co-op program and unique school-work term structure, we will have an opportunity to engage with undergraduate and graduate students throughout the year to become more connected to the transportation systems industry. Thank you to our new executive team, students, and faculty who have committed to moving our chapter forward. I am confident that we have set a strong foundation for the UW-ITE student chapter this past year.

Kind regards,

Alan Xaykongs
President, UW-ITE Student Chapter
